Instructions for Game:

• Choose a card.

• Illustrate the term (located in the center of the card) for your group.

• You *may not* use words, letters, numbers, or hand motions.

• You may tell your group the category.

• Clarifying points have been added to help you understand the term.
Divergent Boundary

Tectonic plates move apart
Between South Arabia and Egypt making Red Sea wider.

Earthquake

Violent movement of the earth.
Tectonic plates grind or slip past each other.

Volcano

Found along the tectonic plate boundaries
Magma, gases, and water from the mantle collect in underground chambers.

Ring of Fire

Around the Pacific Ocean
A zone of volcanoes and frequent earthquakes.

Water Cycle

Solar energy causes some of the surface water to evaporate into atmosphere.

Comprised of four stages.

Tides

Caused by gravitational pull of the moon on oceans.

Ocean Currents

Movements of the ocean’s waters.

Precipitation

Water falls back to the Earth in the form of rain, snow, or hail.
Physical Region

Defined by common landforms, soils, climate, vegetation or animal life.

Formal Region

Clear boundaries and is usually defined by a single characteristic.

Any distinct area based on one characteristic.

Asia

Largest and most populous continent
Himalaya Mountains; Gobi Desert; Ganges River.

Amazon Rainforest

Located in South America
Example of physical region
Climate is hot all year, with frequent rain
Earth’s Mantle
Region of hot, dense rock.
Top of the mantle is solid.

Convection
Spread of heat through the movement of a fluid substance.

Tectonic Plates
Large slabs of rock attached to continents.
Movement of these plates shapes Earth surface.

Lithosphere
Consists of Earth’s crust and the top section of solid mantle.
**Climate**

Average weather conditions of a place over a long period of time.

**Weather**

Conditions in the atmosphere affected by the Earth.

Affected by latitude, elevation, wind patterns, and ocean currents.

**Temperate Climate**

Known as moist mid-latitude climates, with either mild or cold winters

Located in middle latitudes, with low elevations.

**Tropical Moist Climates**

Known as low latitude climates, with warm and humid climates

Central Africa, Central America, South Asia

Category: Culture

Islam

Means: Submission
Founded by Mohammed around 600 A.D.
Qu’ran; The Five Pillars of Faith

Category: Culture

Sikhism

Combines Hindu and Muslim beliefs
Believe that God can be known through meditation

Category: Culture

Social Class

People who share similar wealth, power, and prestige.
Upper class, Middle class, Working class

Category: Culture

Social Mobility

Movement from one class to another
From lower class to upper class
Category: Vocabulary Word

Literacy Rates

The % of People who can Read and Write
Developed Nation = Higher Literacy Rate
Developing Nation = Lower Literacy Rate

Category: Vocabulary Word

Life Expectancy

The Average Life Span of a Human
Developed Nation = Higher Life Expectancy
Developing Nation = Lower Life Expectancy

Category: Vocabulary Word

Import

To Bring in Goods from a Foreign Country
“Goods Come In”

Category: Vocabulary Word

Export

To Send Goods to a Foreign Country
“Goods Go Out”
Category: Vocabulary Word

Industrialization

The # of Babies Born Per 1,000 People
Developing Nations = Higher Infant Mortality
Higher Education = Lower Birth Rates

Category: Climate and Biomes

Biosphere

All life on Earth

Category: Climates and Biomes

Tropical Rainforest

Develop in tropical areas near the equator
Large trees cover the area and topsoil is very thin

Category: Climates and Biomes

Temperate Deciduous Forest

Develop in mid-latitude regions where there is ample rain and moderate temperatures
Cultural Diffusion
The spread of ideas from one culture to another
Trade, migration, and war

Grasslands
Areas exist where the climate is drier and there is not enough rainfall to support large amount of trees.

Deserts
Regions that receive less than 10 inches of rainfall annually.

Tundra
Found closer to polar regions
Soil is so cold that trees cannot grow

</tr>
</tbody>
</table>
Category: Types of Regions

Perceptual Regions

Based on people’s feelings about an area
Examples are Big Apple, Dixie, Deep South

Category: Demography

Suburbs

Develop outside cities
Form satellite cities around older city center

Category: Vocabulary Word

Push Factors

Factors pushing people to leave a place
Examples are poverty, religious persecution, war, and natural disasters

Category: Vocabulary Word

Pull Factors

Factors attracting people to a place
Examples are economic opportunity, greater political/religious freedom
Columbian Exchange
Global Exchange between Europeans and the Americas
Included People, Plants, Animals, Technology, and Disease

Cultural Divergence
Cultural influences cause an area to divide into separate parts

Cultural Convergence
Different cultures exchange ideas and become more similar

Migration
Movement of people from one area to another
