

## Restoring an IPOD Touch to factory settings

1. Open the iTunes program.
2. Connect your Ipod Touch to your computer with the USB cable that came with it.
3. After a few moments your IPOD Touch will appear in the Source panel in tunes, select your Ipod Touch.
4. Click the Restore button.

5. When prompted by iTunes to back up your Ipod touch settings, select the button **Don't Back up**, it will be defaulted to Back Up.

6. You will then be prompted to restore to factory settings, select the Restore button.

7. After a few minutes you will be prompted the Ipod has been restored to factory settings and is restarting and to leave your Ipod connected, select the Ok button.
