SAISD Assistant Dir. Environmental Programs

Environmental Lead (Based-Paint)

- Homes, commercial and public buildings (including schools) built before 1978 have lead-based paint
- Many of our older facilities contain lead-based paint (LBP)
- Disturbing LBP, especially during renovation, repair and painting projects can release dangerous levels of lead dust
- SAISD maintenance uses the EPA “lead safe” techniques to eliminate or minimize LBP dust during renovation, repair and painting projects.

[See the Environmental lead Q&A for additional information.](#)

Technical Assistance and Training

- Technical assistance and training is available for a wide range of issues such as asbestos, hazard communication, “lead safe” procedures, etc. Training Handouts and other materials are available from the Environmental Programs Office.

Demolition

Other Environmental Activity

Last Updated Wednesday, 14 November 2012 23:55

- Demolition of structures (on bond purchased land) not sold at auction are demolished under the guidance of Environmental Programs. Prior to demolition, structures are inspected and all asbestos-containing material (ACM) is removed by a Texas DSHS licensed contractor.
