## **Texas High School Graduates from FY2009**

## **Enrolled in Texas Public or Independent Higher Education in FY 2010**

Source: Texas Higher Education Coordinating Board and Texas Education Agency Includes high schools with more than 25 graduates.

Texas statute requires every school district to include, with their performance report, information received under Texas Education Code §51.403(e). This information, provided to districts from the Texas Higher Education Coordinating Board (THECB), reports on student performance in postsecondary institutions during the first year enrolled after graduation from high school. Student performance is measured by the Grade Point Average (GPA) earned by 2008- 2009 high school graduates who attended public four-year and two-year higher education in FY 2010.

For each student, the grade points and college-level semester credit hours earned by a student in fall 2009, spring 2010, and summer 2010 are added together and averaged to determine the GPA. These GPAs are accumulated in a range of five categories from < 2.0 to > 3.5. If a GPA could not be calculated for some reason, that student is placed in the "Unknown" column. GPA data is only available for students attending public higher education institutions in Texas. If a high school has fewer than five students attending four-year or two-year public higher education institutions, the number of students is shown but no GPA breakout is given. If a student attended both a four-year and a two-year institution in FY 2010, the student's GPA is shown in the type of institution where the most semester credit hours were earned.

The number of students located at Texas independent institutions is presented. Also shown are "not trackable" graduates, those with non-standard ID numbers that cannot be used to match student identifiers at Texas higher education institutions. "Not found" graduates have standard ID numbers but were not located in FY 2010 at Texas higher education institutions. They might have enrolled in higher education outside of Texas.

No data is given for high schools with 25 or fewer graduates. This report attributes students to the level of institution where they earned the most semester credit hours during the whole academic year, not just the fall semester.
