

Subject: Chemistry and Physics

Goals for my class: To be able to see how chemistry and physics are important parts of our life. Without them, we would not have life, our life styles, or the thing that make life easier.

Subject: Physics, ChemBridge

Goal: Students Physics should have a working knowledge of the Concepts surrounding the laws of motion and forces of our world.

Students completing ChemBridge will have completed 6 hours of college credit at the University of Texas at Austin. The successful student will attend college lectures, take responsibility for his/her education, and become better prepared for full time attendance at a University upon graduation.
