

Science

Grade 2

3rd Nine Weeks

This academic overview can be used to monitor and support your child's at-home learning progress.

Unit 5: Weather, Seasons, and Objects in the Sky

Student Learning Targets

- I can explain how objects in the sky change appearance over time.

Questions to Check for Unit Understanding

- What is in the sky during the day and during the night?
- How does the Moon appear to change throughout the month?
- How does the Sun's position in the sky change throughout the day?
- Why aren't stars visible during the day?

Key Academic Vocabulary

- Clouds: made up of tiny droplets or frozen crystals of water
- Constellations: groups of stars that form a picture
- Moon: a large natural object that orbits, or travels around, Earth
- Stars: a big ball of hot gasses
- Sun: a star at the center of our solar system
