This academic overview can be used to monitor and support your child's at-home learning progress.

Unit 1: Introduction & Properties of Objects

Student Learning Targets

- I can make observations about the physical properties of different objects.
- I can identify different physical properties such as big/small, heavy/light, shape, color, and texture.

Questions to Check for Unit Understanding

- What are the different properties of objects?
- How can I compare objects based on the different properties?
- What information is important to record when making observations of objects?

Key Academic Vocabulary

- Color: the share you see when you look at an object
- Compare: to see what is the same or different between two objects
- Shape: the outline of an object
- Texture: how rough or smooth something is
- Property: a single part/characteristic of the way an object is
